

# QUALITY CHECKLIST

## FROM NEWBIE TO PROFESSIONAL ARTIST

I can...

- use correct proportions (head size, arms and legs length, etc).
- draw the right muscles in the right place.
- sketch convincing poses and facial expressions.
- draw a human figure with foreshortening.
  
- set a main light source and a fill light.
- understand volumes and show them with values.
- correctly shade mixing hard and soft edges.
- get rid of pure black and pure white.
  
- paint with a restricted color palette (1-3 colors).
- understand how colors change from shadow to light areas.
- render a variety of materials and effects.
- paint a convincing skin.
  
- apply or disobey the golden rule.
- build realistic perspective.
- set a focus point and stick to it.
- take advantage of the blank space in composition.
- give a sense of depth with light scenery.
